Facility Update

WTT Systems Acquires Manufacturing Facility

CHAGRIN FALLS, OH — WTT Systems, A Millennium Adhesive Company, announces its acquisition of a new manufacturing facility in Chagrin Falls, Ohio. This approximately 65,000 sq. ft. facility expands WTT Systems' production and research capabilities and will be utilized in addition to the current facility, also in Chagrin Falls. WTT Systems will operate both facilities concurrently in order to meet its customers' high service standards and product demands. All Corporate, Administrative, Sales, Technical, Research & Development, and Packaging Operations will be operating out of the new facility by November 2007.

WTT Systems is dedicated to the development of high-performance, solvent free adhesives, sealants, and systems for the Roofing Industry. Its simple, innovative products are quick and easy to apply, and its revolutionary application system saves contractors time and labor. Visit the WTT Systems website at wtus.com.
